A Self-Learning Platform for Digital Order Management

“The financials were clear – I was going to be able to save $1M right off the bat.”
Supply Chain Director

“It offers us a view to the future, predicting what our orders are going to look like.”
Logistics Process Manager

“We saw a 40% FTE reduction in complaint handling.”
Commercial Operations Coordinator

“With OmPrompt, we’re able to step away from the transactional and let the process run itself.”
Head of Customer Supply Chain

“Works great with our SAP systems.”
Supply Chain Director

“OmPrompt makes for happy customers, which is good for renewals.”
Customer Logistics Director

End-to-End Visibility Across Enterprises

Business Insights & Predictive Analytics

Touchless Automation

EDI Connectivity

Unstructured and Structured Data

AI Tools (RPA, Machine Learning)
OmPrompt makes supply chains sentient with our AI-driven platform. We deliver end-to-end connectivity, control, and performance for more profitable order processing, fulfillment and settlement. Our automation solution leverages technologies—from EDI, OCR, and RPA to natural language processing, machine learning, and cognitive computing—to work with your current people and systems (including ERP). Now you can automate with impact; improving OTIF, customer satisfaction and cash flow, all at lower cost.

**Purpose-built digital technology**

- 55+ Countries
- ROI in < 12 months

**Get Control**
- Leverages existing systems, people and processes
- See and capture 100% of required data from any source
- Go paperless, eliminate manual entry

**Get Connectivity**
- Standardizes unstructured and structured data
- Enables management by exception
- Offers control across systems, enterprises and geographies

**Get Performance**
- Increases shelf-life of existing systems and IT investments
- Connects front and back offices, in the multi-enterprise, to seamlessly drive OTIF
- Improves key metrics for customers, supply chain and finance
